

REMARKS

The claims have been amended to more clearly define the invention as disclosed in the written description. In particular, claims 6-10 have been added and present the limitations of claims 1-5 embodied in a monitor.

Applicant believes that these claims are supported by the specification in that a monitor is, in essence, a television receiver absent the tuner circuitry. Since the subject invention relates only to the mounting of a cathode ray tube in a cabinet, and is not concerned with, in particular, the tuner circuitry, Applicant believes that claims 9-16 are, as such, supported by the specification.

Applicant believes that this application, containing claims 1-10, is now in condition for allowance and such action is respectfully requested.

Respectfully submitted,

by
